### Test Review

The area of the circle is  $\pi r^2$ . Subtracting gives the difference between the two areas:  $4r^2 - \pi r^2 = r^2(4 - \pi)$ . 3. E. The sum of angles in a triangle equals 180 degrees. Therefore, solve for the remaining angle by subtracting the sum of the two given angles from 180 degrees:  $180 - (15 + 70) = 95$  degrees. 4.
