Inference, conclusions based on observations. Observation, direct descriptions of evidence. Law of Superposition. When looking at a series of rock layers, the oldest rocks and fossils are at the bottom, the youngest rocks and fossils are at the top. Stratigraphic Column, a diagram representing a series of rock layers. Adaptation.

### Evolution Keywords Flashcards | Quizlet

Evolutionary psychologists study what people look for in a partner, and how these preferences may have been shaped by evolutionary pressures. Based on observations of other species in their natural environments, the evolutionary psychology of human mating tends to lean toward the idea that females are more selective in their partners than males.

### Evolutionary Psychology: Definition and Key Concepts

Evolutionary biology is the subfield of biology that studies the evolutionary processes (natural selection, common descent, speciation) that produced the diversity of life on Earth.In the 1930s, the discipline of evolutionary biology emerged through what Julian Huxley called the modern synthesis of understanding, from previously unrelated fields of biological research, such as genetics and ...
