Patient Journey Mapping Patient journey mapping is a useful strategy to employ during the build-out of any healthcare engagement campaign. As mentioned, the patient journey happens in six distinct stages: It begins with awareness – the moment the patient develops symptoms or becomes motivated to pursue medical treatment – and, in an ideal scenario, never entirely ends.

journey: an introduction | The BMJ

Mapping the patient journey needs careful planning and facilitation to prevent the “blame game” (ie, each group blaming other groups for the problems within the journey).² The first rule of a mapping session is that it must record what the process is, not what people think it should be. Subsequently, the views of individuals need to be confirmed with data in order to distinguish between rhetoric and fact.
