Mig 29

The Mikoyan MiG-29 (Russian: Микоян МиГ-29; NATO reporting name: Fulcrum) is a twin-engine jet fighter aircraft designed in the Soviet Union. Developed by the Mikoyan design bureau as an air superiority fighter during the 1970s, the MiG-29, along with the larger Sukhoi Su-27, was developed to counter new U.S. fighters such as the McDonnell Douglas F-15 Eagle and the General Dynamics F ...

Mikoyan MiG-29 - Wikipedia

The MiG-29M/M2 aircraft is a revision of the basic MiG-29. It achieved a more robust multi-role capability with enhanced use of air-to-air and air-to-ground high-precision weapons. It also featured a considerably increased combat range, owing to an increase in its internal fuel capacity. A few changes took place during the aircraft's development.

Mikoyan MiG-29M - Wikipedia

The MiG-29, first operational in 1985, is a single-seat, twin-engine air-to-air fighter that can also be used for ground attack.

MiG-29 | Soviet aircraft | Britannica

The MiG-29 Fulcrum outside the National Air and Space Intelligence Center at Ohio's Wright-Patterson Air Force Base has a hornet's nest growing in its nose. Its tires, lifted off the ground by stands, are split and shredded. Bird droppings drool off its radome. The aircraft gives the impression of a war prize displayed like a head on a stake.

MiG-29 - Wikipedie

The MiG-28 (МиГ-28 in Cyrillic script) is a twin-engine, single or two-seat fighter jet operated by Soviet bloc air forces. As seen in Top Gun, it uses wingtip-mounted Vympel K-13 (NATO reporting name "AA-2 Atoll") missiles as its primary air to air weapon (the Atoll is a reverse-engineered version of the AIM-9 Sidewinder). MiG is highly maneuverable, but somewhat slower than the F-14 ...
