“Proof” then moves on to secondary steps in alcohol production: distillation and aging. Rogers ends with ancillary topics: the mostly subjective area of smell and taste, and then the objective, but poorly understood, area of the effect of alcohol on the human body and brain. Finally, Rogers caps off the book with a discussion of hangovers.

In Proof, Adam Rogers reveals alcohol as a miracle of science, going deep into the pleasures of making and drinking booze - and the effects of the latter. The people who make and sell alcohol may talk about history and tradition, but alcohol production is really powered by physics, molecular biology, organic chemistry, and a bit of metallurgy - and our taste for those products is a melding of psychology and neurobiology.
