Form Talysurf Series 2 Significance of a straight line Imperative to the measurement of form is the integrity of the reference to which the measured surface is compared. Form Talysurf traverse units are designed and manufactured to exacting standards. Either a 50mm (1.97in) or 120mm (4.72in) traverse length can be provided. Both have a precision

on any form and surface texture instrument. The ultra software menus are structured in a logical, easy to understand sequence. A significant benefit of Form Talysurf Series 2 is system programmability which enables measurement in X, Y and Z axis (Y axis optional), analysis and results output to be made automatically, without operator intervention.

Indicated Gauge Reading Form Talysurf PGI or inductive gauges are very linear within 80% of their gauge range. Taylor Hobson's Ultra software uses the 80% default gauge range during calibration due to inherent none linearity's towards the end of the gauge travel. This can be seen on the chart above showing a straight line between indicated
